Working Papers

“Trends in Health and Access to Care by Sexual Orientation: Evidence from the 2013–2024 National Health Interview Survey.” Gilbert Gonzales, **Dalton Malmin**, Christopher Julian.

Description: This study examines trends in health and cost-related barriers to care by sexual orientation in the United States from 2013 to 2024 using repeated cross-sectional National Health Interview Survey data. We estimate weighted prevalence and adjusted survey-weighted logistic regression models comparing heterosexual, gay/lesbian, and bisexual adults on health, smoking, psychological distress, and unmet care due to cost.

Works in Progress

“What Survives a Plan Cap? Insurer Portfolio Choice in the ACA Marketplaces.” **Dalton Malmin**.

Description: I study how multiproduct insurers reorganize their portfolios under numerical caps on non-standardized plan offerings in the ACA Marketplaces. Using CMS plan, enrollment, and crosswalk data, I trace changes in consumer-facing menus, compare observed retention choices with cap-feasible alternatives, and examine whether official reenrollment mappings preserve the financial and nonprice attributes of offerings that disappear.
