Working Papers

“Trends in Mental Health by Sexual Orientation: Evidence from the 2013–2024 National Health Interview Survey.” Gilbert Gonzales, **Dalton Malmin**, Christopher Julian. *Submitted*.

Description: This study examines trends in mental health and cost-related barriers to mental health care by sexual orientation in the United States from 2013 to 2024 using repeated cross-sectional National Health Interview Survey data. We estimate weighted prevalence and adjusted survey-weighted logistic regression models comparing heterosexual, gay/lesbian, bisexual, and "something else" respondents on psychological distress, anxiety and depression, medication use, and unmet mental health care due to cost.

Works in Progress

“Health Insurance Arrangements Among Same-Sex and Different-Sex Couples in the United States.” **Dalton Malmin**, Gilbert Gonzales, Christopher Julian.

Description: This study examines health insurance arrangements among same-sex and different-sex couples using pooled 2019–2025 Current Population Survey Annual Social and Economic Supplement data. We estimate weighted percentages and adjusted differences in shared employer-sponsored coverage, separate and mixed coverage, and uninsurance, examining marital status and both partners’ employment characteristics.
