Working Papers

“Trends in Health and Access to Care by Sexual Orientation: Evidence from the 2013–2024 National Health Interview Survey.” Gilbert Gonzales, **Dalton Malmin**, Christopher Julian.

Description: This study examines trends in health and cost-related barriers to care by sexual orientation in the United States from 2013 to 2024 using repeated cross-sectional National Health Interview Survey data. We estimate weighted prevalence and adjusted survey-weighted logistic regression models comparing heterosexual, gay/lesbian, and bisexual adults on health, smoking, psychological distress, and unmet care due to cost.

Works in Progress

“Firm Behavior in Health Insurance Markets: Evidence from ACA Marketplace Caps.” **Dalton Malmin**.

Description: I study CMS caps on non-standardized ACA Marketplace plans as a regulatory shock to insurer product menus. Using CMS Marketplace data from 2022–2025, I show that exposed menus compressed sharply toward the caps and examine whether this pruning primarily removed low-enrollment clutter or also reduced plan differentiation across provider networks and cost-sharing designs.
